

# City of Coral Gables

## Hurricane Irma Debris Removal Operations

### First Pass 9/16 - 9/28

## Legend

- Zone 1
- Zone 2
- Zone 3
- Zone 4
- Zone 5

### Completed - First Pass

First pass involves the collection of post storm vegetative debris. During this phase, piles containing large pieces generated by larger trees will not be picked up. These pieces will be reduced in size by follow up crews in preparation for removal under subsequent passes. No co-mingled debris will be picked up, unless in limited low-lying coastal areas affected by storm surge. To facilitate removal efforts, residents are to keep vegetative debris piles free of other materials. Failure to do so may delay pick up. Subsequent passes through the City will take place as soon as first pass is complete.
