

Stop the Clock!

For this game you will need to think fast and think outside the box with. Choose a letter from the alphabet for each round. There is a 10 minute timer for each round. In that round you must name something in each of the categories that starts with that letter. You must fill out ALL categories before you can yell "stop the clock".

Once that is said all other players must put down their pens. The leader of the round will check the answer sheets, 1 point for each category, double points if it has two words with the same starting letter. However, if more than one person put the same answer for their category, no one gets a point. You can play multiple rounds.
