

CITY OF CORAL GABLES

PUBLIC SAFETY BUILDING CONSTRUCTION UPDATE

JULY 2019

CONSTRUCTION PROGRESS

The City of Coral Gables New Public Safety Building project is a step closer to topping out. This month our project team will continue the on-going installation of pre-cast concrete joists and the construction of beams, columns, and slab on the 5th floor. The 5th floor slab will consist of two concrete pours - 700 cubic yards and 500 cubic yards. While the building shell goes up, the project team also gears up for the start of underground utilities in mid-July.
